GCP 4000—DT 5.8.4 Update

29th June 2018   TTTBLXP077   Issue 1.0

1 Applicability

All existing and new users of GCP 4000 Grade Crossing Predictors and HD/Link systems.

2 Information

The PC version of the Diagnostic Terminal (DT) has been updated from version 5.8.1 to version 5.8.4.

This release of DT is to fix issues some users were having when trying to install version 5.8.1 on Windows 7 32-bit computers.

The functionality of the DT program remains unchanged.

Table 1: Windows Version Compatibility

DT Version	Windows XP	Windows 7	Windows 10
Up to DT 5.7.6	✓	✓	✗
DT 5.8.0 and greater	✗	✓	✓

3 What do I need to do?

3.1 Design and Support Tools

There is no need to update your version of DT if the previous version installed correctly.

Please contact your Siemens sales representative if you require a copy of DT version 5.8.4.

3.2 Type Approval

We assume that this will not impact on any previous type approvals as this update is a change to the installation of the DT program with no safety implications.

However, should you need to update your type approval, please contact us to discuss the next steps.
